Amendments to the Claims

1. (Currently amended) An implantable device for changing the spatial relationship between first and second bones, the device comprising a body configured and dimensioned for insertion into a joint located between the first and second bones and coated with a bone growth promoting material, wherein the bone growth promoting material includes a bone morphogenic protein and wherein the body includes bone-contacting first and second major surfaces, a side surface therebetween, and a first channel extending through the first major surface and side surface.
2. (Withdrawn) The device of claim 1 wherein the bone growth promoting material includes demineralized bone.
3. (Withdrawn) The device of claim 2 wherein the demineralized bone is a powder.
4. (Original) The device of claim 1 wherein the bone growth promoting material includes collagen.
5. (Original) The device of claim 4 wherein the collagen is in the form of apatite compositions with collagen.
6. (Original) The device of claim 4 wherein the bone growth promoting material includes demineralized bone.
7. (Original) The device of claim 6 wherein the demineralized bone is a powder.
8. (Original) The device of claim 1 wherein the body has an open cellular structure to provide cavities in which bone can grow through.

9. (Original) The device of claim 8 wherein the body is made of a biocompatible metallic material.
10. (Original) The device of claim 9 wherein the body is made of tantalum.
11. (Withdrawn) The device of claim 9 wherein the body is made of stainless steel.
12. (Withdrawn) The device of claim 8 wherein the body includes a compartment for holding bone growth inducing material.
13. (Original) The device of claim 8 wherein at least some of the cavities contain a bone growth promoting material.
14. (Currently amended) The device of claim 1 further including fastener means for fixedly connecting the body to ~~at least one of the first bone and second bones~~, the fastener means disposed in the first channel.
15. (Currently amended) The device of claim 14 wherein the fastener means includes a ~~at least one~~ screw.
- 16-18. (Canceled)
19. (Currently amended) The device of claim 1 ~~18~~ wherein at least a portion of the side surface has a configuration corresponding to at least a section of an outer side surface of one of the first and second bones.
20. (New) The device of claim 1 further including a second channel extending through the second major surface and the side surface.
